

## 6. Project Reading Voices

The aim of this project is to bring together senior citizens with free time and a desire to socialise with immigrants who want to improve their Portuguese pronunciation and intonation.

By promoting social connections and cultural exchange with the elderly, the goal is to facilitate language learning among foreigners through reading

An innovative idea that comes from the proposal of a user and friend of the Penha de França Library, part of the Intergenerational Language Reading Program, which promotes learning between different generations by encouraging the exchange of experiences and the development of reading and literacy skills, as well as intercultural understanding.

An approach based on reading together and complemented by conversation brings generations together through reading children's books, poems, and other genres by Portuguese authors.

Target-audience: The adult community, senior citizens and immigrants with intermediate or advanced Portuguese language skills.

- Duration: 45- to 60- minute sessions.
- Location: Penha de França Library.
- Free activity.
